

## Fully Automatic Commercial Coffee Machine

### TRANSFORM YOUR **COFFEE EXPERIENCE**

Dr.coffee

## T200

The T200 is a fully automatic bean-to-cup coffee machine designed for commercial catering and office environments. It is available in two versions to meet your specific operational needs:

**T200-MP** (Fresh Milk Model) Equipped with two bean hoppers and two powder canisters, the T200-MP uses fresh milk in combination with powdered options such as chocolate, matcha or alternative milks. There is a cold foamed milk option ideal for iced coffee drinks. Compatible with the SC10, SC12 and SC12-T dual milk fridge.

**T200-P** (Powdered Milk Model) Designed for locations where fresh milk storage is less practical, the T200-P uses one of its powder canisters for powdered milk, ensuring consistent milk-based drinks with minimal maintenance.

With a capacity of 200 drinks per day, the T200 is ideally suited for HoReCa, workplaces, and offices. It is equipped with 2 x 700ml steam and espresso boilers to guarantee continuous product output, and a metal brewer that boasts a 21g capacity.

To help enhance the flavour of every coffee drink, this machine is supplied with specially crafted ceramic grinders. Ideal for self service, the T200 is supplied with lockable hoppers and compatible with all payment systems via MDB communications.
